Subject: Application for the Generative AI Engineer Position

Dear Hiring Manager,

I am excited to apply for the **Generative AI Engineer** position. As a final-year Computer Engineering student with hands-on experience building production-grade AI applications, LLM-powered systems, and scalable machine learning pipelines, I am eager to contribute to innovative AI solutions. My internship at Scrapiz Greentech Pvt. Ltd. enabled me to develop backend services and an internal Retrieval-Augmented Generation (RAG) platform that processed KYC documents using Apache Airflow, vector databases, hybrid chunking, and re-ranking techniques. This experience strengthened my skills in Python, cloud-native development, distributed systems, and deploying reliable AI applications in production environments.

Beyond my internship, I have independently developed AI-focused projects including **BrandGuardian**, a multimodal compliance auditing platform leveraging LangGraph, Hugging Face, Groq LLMs, FastAPI, AWS, and Qdrant to deliver explainable AI-driven decisions, and **MobCloudX**, an AI-powered adaptive video streaming platform utilizing CNN-LSTM models, reinforcement learning, Kafka, and AWS infrastructure. These projects enhanced my expertise in Generative AI, Natural Language Processing, deep learning, and production-scale ML engineering while reinforcing my passion for building intelligent systems that solve real-world problems.

With strong proficiency in Python, PyTorch, TensorFlow, Hugging Face Transformers, LangChain, LangGraph, Prompt Engineering, and Retrieval-Augmented Generation, complemented by a GPA of 9.03 and over 550 solved DSA problems, I am confident in my ability to contribute meaningfully to your AI team. I am enthusiastic about learning from experienced engineers while applying my technical foundation, problem-solving mindset, and passion for Generative AI to create impactful solutions. Thank you for your time and consideration. I look forward to the opportunity to discuss how I can contribute to your organization's AI initiatives.

Sincerely,
Ayaan Amjad
